

Ref. No. :

Date : 13.01.2020

Respected Sir,

We firmly read your suggestions and we are agree with you and we like to inform you that you can start your work for build our website like as following manner.

1) We like to build our website similar as <https://www.udemy.com/>:

We suggest to build a new site with a more advanced and secure technology called Laravel. Security facility installed on the website.

Site will have it's own products/courses and can provide multiple combo products and place a price easily.

No need to go to Cart Flow and add the products every time

Site is Digital marketing and SEO friendly so that Site get lot of enquirers once you start doing digital marketing.

Each student can login their dashboard, can see the courses booked and download those courses easily.

They can also get the new courses attached to the package they bought easily.

They can also the videos/lectures

Site will have its own E-commerce facility which can have the following features

You can provide discount for a particular period

You can provide FREE courses to few talented students

You can run online competition so that you can select few best students and provide them scholarship

2) Content Developer Module

Each contributor will get a username and password and they can login the site

They can see the content contributed by them

They can see the list of People purchased their content

They can see their earnings

They can withdraw the money

3) Distributor Channels

Each distributor can login the website

They will get a Unique link for the product page

If anyone buys through that link, site would capture that and that distributor would get commission for the same

Distributor can see how many he/she sold

How much he/she earned

He/she can withdraw the money

4) Android App for Students only
